* Endpoint Detection and Response is available in a preview mode for 2021 year absolutely at no cost for Endpoint Security Cloud Plus users.

kaspersky BRING ON
THE FUTURE

Kaspersky Endpoint Security Cloud provides a single solution for all your organization's IT security needs. You can make sure your business is running smoothly while Kaspersky is blocking ransomware, file-less malware, zero day attacks and other emerging threats.

Our cloud-based approach means your users can work securely on any device, and collaborate safely online, at work or at home, from remote offices and in the field. And our cloud-based console means your security can be managed from anywhere, any time.

Kaspersky Endpoint Security Cloud promotes safe cloud adoption, with Shadow IT Discovery and protection for MS Office 365. Getting started is quick and easy, with no need to set up a server or configure security policies, and your users are protected from the instant they come online. As well as being more secure, you'll find that with Kaspersky Endpoint Security Cloud you actually spend less time managing your IT security, so you can stay focused on high priority business tasks.

Mobile security and management for two devices in each user license

- **Anti-virus protection** defends against threats, viruses, and other malicious applications in real time.
- **Web protection** blocks access to phishing and malicious websites, and monitors access to websites.
- **Password protection** secures device access with a screen unlock password supporting Face ID and Touch ID.
- **Application and feature controls** restrict inappropriate use of corporate policy apps and mobile device features.
- **Anti-theft** allows you to remotely locate, lock or sound an alarm, or wipe data from a device that's been lost or stolen.
- **Rich capabilities for supervised devices** give businesses greater control over their iOS devices.

A single security solution for all your IT security needs

All you need to protect Windows desktops and file servers, Mac OS devices, iOS and Android mobiles and even Microsoft Office 365.

It's easy to sign up for a Kaspersky Endpoint Security Cloud account and deploy endpoint agents remotely, instead of getting tied up in hardware and software provisioning. Enjoy immediate protection with pre-defined policies developed by our security professionals as well as automatic threat prevention and malicious activity rollback, for an effortless response and overall time savings.

Endpoint Detection and Response preview 2021

Don't miss your chance to have access to the Enterprise-grade cybersecurity tool like Endpoint Detection and Response with no effort or extra costs. The only thing you need to evaluate it is Kaspersky Endpoint Security PLUS license. Our EDR approach provides threat visibility, simple investigation tools and effortless response in order to detect threats, reveal their full scope and origins as well as help with timely mitigation. The easy and laborsaving user experience allows IT staff to perform root cause analysis with detailed kill-chain formatted information on a detected object.

Be anywhere and protect anywhere

Regardless of where your physical office is located today, and where your users may be while they're getting the job done, protect them all through the cloud-based console. Secure geographically separated offices, home or field-based workers, at their desks or on the go, no matter what device

Cloud Discovery

Reduce the number of uncontrolled cloud IT services on the corporate network, such as:

- File sharing
- Web email
- Social networks
- Messengers
- And much more

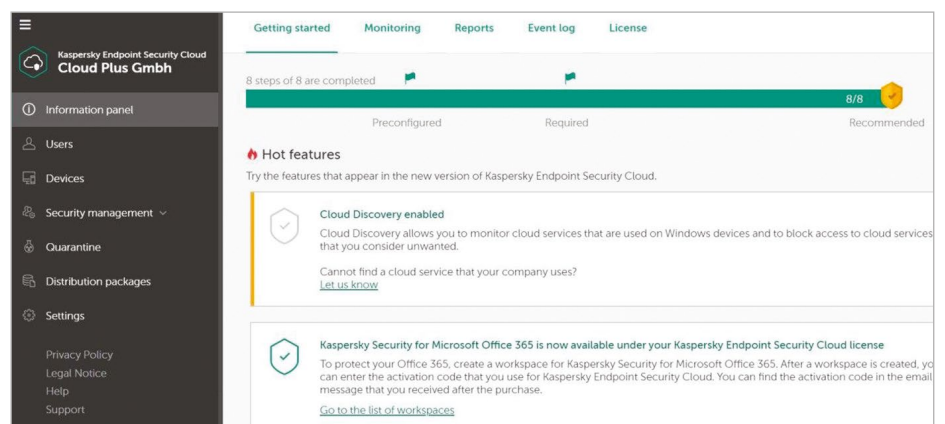

they're working with. Enable remote encryption to make sure your corporate data is safe, even if a device gets lost or stolen. A rich set of device management capabilities helps ensure that mobile devices out of your sight are still secure and under your control.

Take control of the cloud

You know for sure that your users will be generating 'Shadow IT' at work with the speed of light, chatting on instant messengers, sharing files with personal cloud disks, sending emails from personal accounts and wasting time on social networks. Know your Shadow IT and keep control of your infrastructure, restrict unsanctioned cloud services or particular users on your network, and avoid data breaches. Meanwhile, enable safe collaboration and communication in Microsoft Office 365 – protection for all its major apps is already included¹ in Kaspersky Endpoint Security Cloud.

Discover and control Shadow IT

Web interface tailored for busy IT admin
